Subject: Resolution Approving Significant Modification of Building Better Communities General Obligation Bond Project No. 138 to Reduce Its Allocation and Reallocate Surplus Funds to Project No. 348

RECOMMENDATION

It is recommended that the Board of County Commissioners (Board) approve the attached resolution, which does the following:

- Approves a significant modification to Building Better Communities General Obligation Bond (Bond) Program Project No. 138 – "Tamiami Swing Bridge" to reduce the original allocation of \$19,000,000 assigned to the project by \$3,864,130 to \$15,135,870.
- Pursuant to Implementing Order (IO) 3-47, designates \$3,864,130 as surplus funds.
- Approves a significant modification to Bond Program Project No. 348 – "West Venetian Bascule Bridge Replacement" to increase its total allocation from \$10,100,000 to \$13,964,130 in order to address the budget shortfall in Project No. 348.

SCOPE

The Tamiami Bridge is located within Commissioner Bruno Barriero's District 5. The West Venetian Bascule Bridge is located within Commissioner Audrey Edmonson's District 3.

FISCAL IMPACT/FUNDING SOURCE

Project 138 has an original allocation of \$19,000,000 and an existing balance of \$15,547,000 in proceeds that have not yet been utilized. This item reallocates \$3,864,130 of those Project 138 funds (approximately 20 percent of the original Bond Program allocation) to Project No. 348 to address a budget shortfall in Project No. 348. Proceeds in the amount of \$3,864,130 from Road Impact Fees (RIF), District 2, will be allocated to the Tamiami Swing Bridge project in order to compensate for the funds being reallocated from Project No. 138 to Project No. 348.

TRACKING/MONITOR

The Public Works and Waste Management Department (PWWM) will implement the project and the Office of Management and Budget will monitor the project.

DELEGATION OF AUTHORITY

There is no additional delegation of authority related to this item.

BACKGROUND

The Bond Program was approved by the voters in 2004, with one (1) of the questions authorizing expenditures to construct and improve walkways, bikeways, bridges, public infrastructure and neighborhood improvements. The Board, through Resolution No. R-914-04, approved a number of projects to construct and improve bridges throughout the County. On May 20, 2014, the Board approved Resolution R-466-14, which approved the significant modification of Bond Program Project Nos. 132 – "Sonovoid Bridge Improvement Program" and 133 – "SW 296 Street Sonovoid Bridge over C-103 (874105) Canal" and the deletion of Bond Program Project No. 137 – "Palmer Lake Bridge" in

order to obtain \$10.1 million of surplus funds. That same Resolution No. R-466-14 then added new Bond Program Project 348 – "West Venetian Bascule Bridge Replacement" to Appendix A of Resolution No. R-914-04 to effectuate the needed replacement of approximately the Westernmost 730 feet of the West Venetian Bascule Bridge (Bridge) on the Venetian Causeway (Causeway). The Board allocated the \$10,100,000 in Bond Program surplus funds taken from Project Nos. 132, 133, and 137 to Project 348 based on cost estimates. However, during the procurement process, it was determined that the actual cost to replace the Bridge exceeded the estimated cost by \$2,333,100, which would be made available by approval of this item.

As referenced in my Memo to the Board dated April 11, 2014, temporary steel plates have been installed to address damage to the Bridge's deck and, as a preventative measure, in other areas identified during inspections by PWWM staff and an FDOT bridge inspection consultant. Additionally, signage was installed reducing allowable loads as a result of load ratings conducted by FDOT. Specifically, these new load ratings increased weight restrictions from 15 tons to 11 tons on all bridges except the Bridge which was posted at five (5) tons and the easternmost Bridge (No. 874481) on the Causeway which was posted at sixteen (16) tons.

As such, the need to expedite the replacement of the affected segment of the Bridge is critical to avoid any further damage to the Bridge deck and the associated costs for temporary repairs, and impacts to the travelling public. Additionally, current conditions limit access to commercial, mass transit, and emergency vehicles, which could potentially be exacerbated by further delays. Finally, the Causeway provides the sole ingress and egress route for area residents and a valuable access point between the mainland and City of Miami Beach for both recreational and commercial ventures. These conditions and the scope of work and timeline for the replacement have been coordinated with the Cities of Miami Beach and Miami, the Coast Guard, and the Venetian Island Homeowner's Associations.

A recommendation for award of a Design/Build contract to effectuate the complete replacement of the affected segment of the Bridge is being finalized. Construction is expected to commence within the next three (3) months. Actual construction is expected to take six (6) to nine (9) months thereafter, during which time the Bridge will be closed to all traffic. The work will consist of the complete demolition of the existing Bridge, and the construction of an entirely new bridge from foundations to bridge deck. Once completed, the current five (5) ton weight restriction will be removed and the life expectancy of the West Venetian Bascule Bridge will be 60 years.

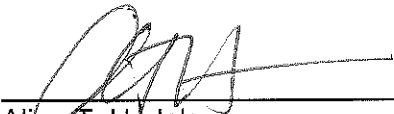

It is therefore recommended the significant modification of both Bond Program Project Nos. 138 and 348 in order to reduce the allocation of \$19,000,000 of Project No. 138 by \$3,864,130 to \$15,135,870 and to utilize those surplus funds to fund the budget shortfall in Project No. 348 by increasing its allocation of \$10,100,000 to \$13,964,130. There is insufficient funding for the Venetian Bridge Restoration and programmed GOB funding will be reallocated to cover the gap. The Venetian Bridge Restoration does not qualify for RIF funding while the Tamiami Swing Bridge is eligible for RIF and will be replenished with RIF funding.

The amount of RIF2 funding to be added for Renovation of the Tamiami Swing Bridge is to be the same as the GOB funding being reallocated from Renovation of the Tamiami Swing Bridge to Venetian Bridge Restoration - \$3,864,130.

IO 3-47, which governs the BBC GOB program, stipulates that an application of surplus funds to fund a project with a budget shortfall needs to be presented to the BBC GOB Citizens' Advisory Committee (CAC). Accordingly, at its January 30, 2015 meeting, this item was presented to the BBC GOB

Citizens' Advisory Committee (CAC) for its review and received a favorable recommendation. These evaluation factors were consistent with IO 3-47 section e and the department considered the following:

- 1) The Project would have a positive impact on crime in the project area (in accordance with Resolution No. R-67-08)
- 2) The Project would have a positive impact on the poverty in the project area (in accordance with Resolution No. R-67-08)
- 3) The Project would have a positive impact on the safety of the West Venetian Bascule Bridge.
- 4) The Project would have a positive impact on the housing needs in the project area.
- 5) The Project would spur economic development in the project area.
- 6) The Project would have a positive impact on the healthcare of the population of Miami-Dade County.
- 7) The Project would have a positive impact on the environment of the County.
